

PRODUCT BRIEF

Sentinel LDK RTE

Integration of Software Monetization / Licensing Technologies in NI's LabVIEW (graphical system design)

Software Monetization with Sentinel LDK Runtime API for the LabVIEW environment

Sentinel License Development Kit (LDK) is a comprehensive software monetization solution which incorporates the company's award-winning software copy and intellectual property (IP) protection features. This flexible software licensing toolkit gives you the freedom to design and implement the right licensing experience when developing with LabVIEW.

LabVIEW from National Instruments

Together with NI's graphical programming language LabVIEW, it is now possible to implement Gemalto's software monetization system "Sentinel LDK" in the LabVIEW environment.

How to use Gemalto Sentinel LDK API in LabVIEW?

There are 2 steps how to get it up and running:

Step 1 - LDK Registration

Please register on the Sentinel LDK website <http://www.safenet-inc.com/sentinel-ldk-download/> to get access to the detailed document and to request a LDK development kit.

Step 2 - Have the LabVIEW system running

Follow the Gemalto documentation to install the LabVIEW Add-On auto installer for LabVIEW 2011/2012/2013/2014/2015. For training purposes an example code is available.

Step 3 - Start LabVIEW

After having LabVIEW started on your development system, you will find the Gemalto's Sentinel LDK Add-On VI's in the function palette in the user libraries.

About Gemalto Software Monetization

Gemalto, through its acquisition of SafeNet, is the market-leading provider of software licensing and entitlement management solutions for on-premises, embedded and cloud-based software vendors. Gemalto's Sentinel is the most trusted brand in the software industry for secure, flexible, and future-proof software monetization solutions.

Features

Sentinel LDK Embedded

- > Flexible license management
- > Easy integration
- > Secure finger print
- > Very small code size

License keys supported

- > Software license key
- > USB key (various sizes)
- > USB plug in board
- > Chip solution

Additional available features

- > Sentinel EMS (Entitlement management system)
- > SAP connector
- > Oracle connector
- > Salesforce connector

Technical Specifications

Gemalto products supported

- > Sentinel LDK 6 HL
- > Sentinel LDK Embedded 6 HL
- > LDK API basic licensing* for LabVIEW

Operating Systems Supported

- > Intel x86
- > Windows XP, 7, 8 (32bit) (64bit on request)
- > Functions: `sntl_admin_context_new`, `sntl_admin_get`, `hasp_login`, `hasp_logout`

About National Instruments

Since 1976, National Instruments (www.ni.com) has equipped engineers and scientists with tools that accelerate productivity, innovation and discovery. NI's graphical system design approach to engineering provides an integrated software and hardware platform that speeds the development of any system needing measurement and control. The company's long-term vision and focus on improving society through its technology supports the success of its customers, employees, suppliers and shareholders.
